Choo Choo

AI coding-agent orchestration

A warm signal for focused work.
One locomotive. One recognizable identity.

Brand guidelines

Logo / Color / Type / App icons

Purposeful. Approachable. In motion.

A desktop identity for people directing AI coding agents.

Choo Choo brings a familiar metaphor to an emerging workflow: a clear direction, coordinated movement, and a visible signal at the front.

The minimalist locomotive is the primary brand. Its angled cab creates momentum; the circular front anchors the silhouette; the amber lamp adds warmth. The orange cowcatcher makes the mark recognizable at a glance.

Clear

Name the action and show what happens next.

Warm

Use everyday language and restrained playfulness.

Capable

Explain concrete behavior. Avoid inflated promises.

A complete family. One silhouette.

Choose the layout that fits the space. Preserve the supplied proportions and spacing.

Give the locomotive room.

Clear space is measured from visible artwork, including the steam and cowcatcher.

Minimum clear space

Keep at least 1X around every side of the logo. X is the lamp diameter: 128 units on the 1254-unit symbol grid. Add more space for prominent placements.

Minimum display sizes

Standard symbol	48 px high
Horizontal lockup	180 px wide
Standalone wordmark	120 px wide
Stacked lockup	160 px wide

Use the micro symbol for small raster exports up to 64 px. App tiles have their own fixed padding; do not add logo clear space inside the tile.

Charcoal structure. Warm highlights.

Use charcoal and cream as the foundation. Orange is the signature accent; amber belongs to the lamp.

Charcoal

#202226

RGB 32, 34, 38

Primary surfaces + text

Cream

#F4EBD8

RGB 244, 235, 216

Primary mark + light UI

Amber

#FFC46B

RGB 255, 196, 107

Lamp + warm emphasis

Orange

#F4773D

RGB 244, 119, 61

Cowcatcher + action accent

- Midnight #111218
- Paper #FFFCF5
- Copper #9C431A
- Slate #676B73
- Ash #A6A7AE

Make every label readable.

Calculated from the kit's exact sRGB values. Ratios below apply to text and solid-color backgrounds.

Aa Choo Choo

13.44:1 / Primary text

WCAG AA normal text: pass

Aa Choo Choo

13.44:1 / Light UI

WCAG AA normal text: pass

Aa Choo Choo

5.73:1 / Action button

WCAG AA normal text: pass

Aa Choo Choo

5.48:1 / Links on light

WCAG AA normal text: pass

Target at least 4.5:1 for normal text and 3:1 for large text. Use charcoal text on orange buttons. Cream on orange and amber on cream are decorative pairings, unsuitable for body text. Pair status colors with a label or symbol.

Manrope + JetBrains Mono

A geometric sans for the brand; a precise mono for code, identifiers, and technical labels.

Manrope

Aa Bb Cc 0123456789

Brand headlines and wordmark: 750 weight.
UI labels: 600. Body: 400-500.
Wordmark tracking: -0.025em, supplied as outlines.

JetBrains Mono

agent-01 / ready

Use for code, paths, counters, and compact metadata. Default to 400-500 weight. Disable ligatures where literal character recognition matters.

Display	48 / 56 px	Weight 750	-0.025em
Heading	32 / 40 px	Weight 700	-0.015em
Body	16 / 24 px	Weight 450	0
Label / code	13 / 20 px	Weight 500	0

Built for the desktop. Tuned for scale.

The master and micro drawings share the same direction, lamp, cab, and warm accent.

DEFAULT / DARK

LIGHT

MONO

SMALL-SIZE PROOF / 1 PDF POINT PER PIXEL

16 24 32 48 64

At 64 px and below, the micro drawing removes the side swoosh, widens the cab details, and reduces the plow to two slots. At 128 px and above, use the full mark and restrained lamp glow.

Use the right container.

Two distinct installation paths are included. Their files are named for the workflow they support.

Classic macOS assets

Use ChooChoo.icns with desktop packaging tools, or copy AppIcon.appiconset into an existing Xcode asset catalog.

The supplied rounded PNGs include a transparent outer margin and baked tile corners. The iconset contains 16, 32, 128, 256, and 512 pt entries at 1x and 2x, up to 1024 px.

`03-app-icons/macos/`

Current layered workflow

Start a 1024 x 1024 document in Apple Icon Composer. Use the supplied full-bleed background and aligned cream, orange, and lamp foreground layers.

Import at the original size, preserve layer alignment, and let the system mask the icon. Set Default, Dark, and Mono appearance behavior, then save the .icon document for Xcode.

Layer sources are included; a compiled .icon document is not included.

`03-app-icons/icon-composer-layers/`

Menu bar: use ChooChooTemplate.png and @2x at 18 pt; set NSImage.isTemplate = true. Test the final icon inside the app on each supported macOS release.

Preserve the signal.

Keep the recognizable geometry and use the supplied treatment for the background.

01 Keep the approved silhouette.

Preserve the two-lobe steam, angled cab, circular front, and forward-facing cowcatcher.

02 Choose a matching treatment.

Use cream artwork on dark surfaces and charcoal artwork on light surfaces. Use mono for single-ink applications.

03 Scale the entire lockup.

Keep symbol, lettering, and gaps in proportion. Never stretch, rotate, mirror, or rearrange the parts.

04 Keep effects restrained.

Use the supplied lamp glow only in large app or promotional artwork. Keep the core logo flat.

05 Protect the clear space.

Avoid crowded backgrounds, added containers, rails, outlines, scenery, or text inside the app tile.

06 Use the micro asset when needed.

Do not shrink the detailed master into a menu-bar icon. Use the prepared alpha-only template.

A friendly name. A focused voice.

Write the name as "Choo Choo": two words, title case. Use the supplied outlined wordmark for logos.

Ready-to-use launch assets

Open Graph 1200 x 630, social banner 1500 x 500, and a square avatar. Replace surrounding campaign copy as the product evolves; keep the logo intact.

STATUS

Ready for your review

RECOVERY

Connection lost. Reconnect to continue.

Use train language sparingly. Task labels and error messages should remain literal and useful.

Ready to put to work.

The SVG files are the editable geometry masters. All supplied logo lettering is outlined.

`00-start-here`	Visual overview and offline asset browser
`01-guidelines`	This PDF guide
`02-logo`	Symbol, horizontal, stacked, and wordmark SVG/PNG
`03-app-icons`	16-1024 px, iconset, ICNS, Xcode catalog, layer sources
`04-color + 05-typography`	sRGB palette, swatches, variable fonts and licenses
`06-social + 07-developer`	Social exports, favicon, CSS tokens and manifest
`08-source`	References, geometry build scripts, export queue

Provenance: the primary mark is a clean vector reconstruction of the supplied minimalist image. The earlier illustrated image is archived as reference. The initial generated reconstruction study was superseded when the original became available. Small-size geometry is intentionally simplified.

Fonts are bundled under SIL OFL 1.1, with license texts. Font files may be distributed with the product under those terms. The kit does not claim trademark clearance or exclusive rights.
